Note that the S̄/PIN10 on IC30 is not mentioned in the original schematic.

While the original BOM specifies a 74LS04 for the oscillator, I had much better stability using either an 74ALS04 or a plain 7404.

In the original schematic PIN38 is connected to both GND and a pullup...

Note that in the original schematic B_SYNC is connected to CONN.7 only. And yet, the PCB connects it through all the other bus connectors.
